## INSPIRED BY NORDIC NATURE

Balteco was established by a group of talented and ambitious engineers in 1990. Through continuous development of designer baths we have grown to become one of the leading producers of bathroom products in Northern Europe.

Our aspiration and everyday challenge is to design for our customers the best wellness products with original design, premium quality and innovative functional features.

# STANDARD-SETTING PRODUCT DEVELOPMENT

**EXCLUSIVENESS IN DETAILS**  
Only manufacturer in Northern Europe to offer chromed brass covers for under-water jets. Balteco does not use plastic covers that are remarkably less resistant for scratches.

## AUTOFILL

An electronic bath fill-up assistance system allows for convenient and safe bath filling. Upon AutoFill activation the water flow from the bath mixer is automatically stopped when bath is full of water and system gives attention sound signal.

## AMBILIGHT LED-LIGHTING

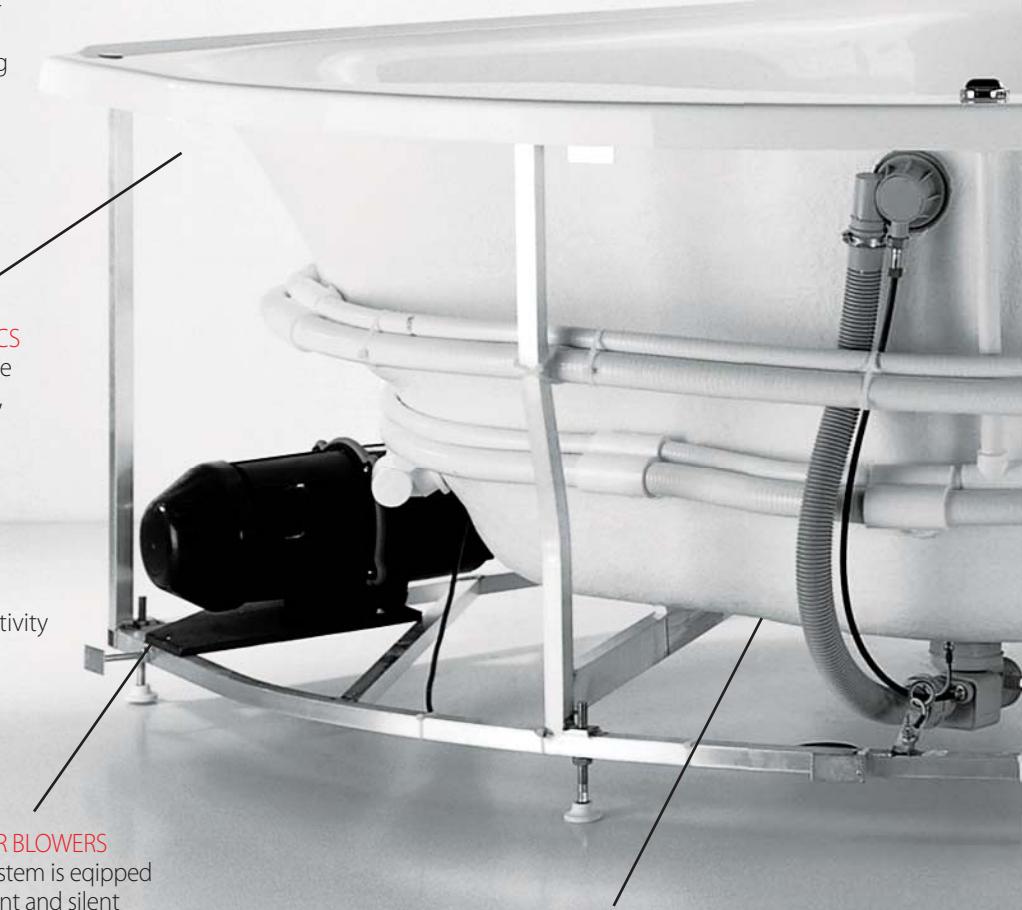

Custom designed chromotherapy lighting systems have been designed using the latest RGB LED technology delivering a wide variety of bright color tones or a slow color rotation program.

**HIGH QUALITY SANITARY ACRYLICS**  
All Balteco acrylic baths are made of high quality sanitary acrylics, Altuglas (France)

- Durable
- Chemically resistant
- Non-allergenic
- Non-porous surface
- Easy to clean
- Low thermal conductivity
- Deep gloss
- Repairable

**SILENT AIR BLOWERS**  
Airmassage system is equipped with efficient and silent pre-warmed air blowers (500 W)

## POLYCORE™ REINFORCEMENT

Reinforced bath bottom structure triple layer technology makes the bottom extra strong

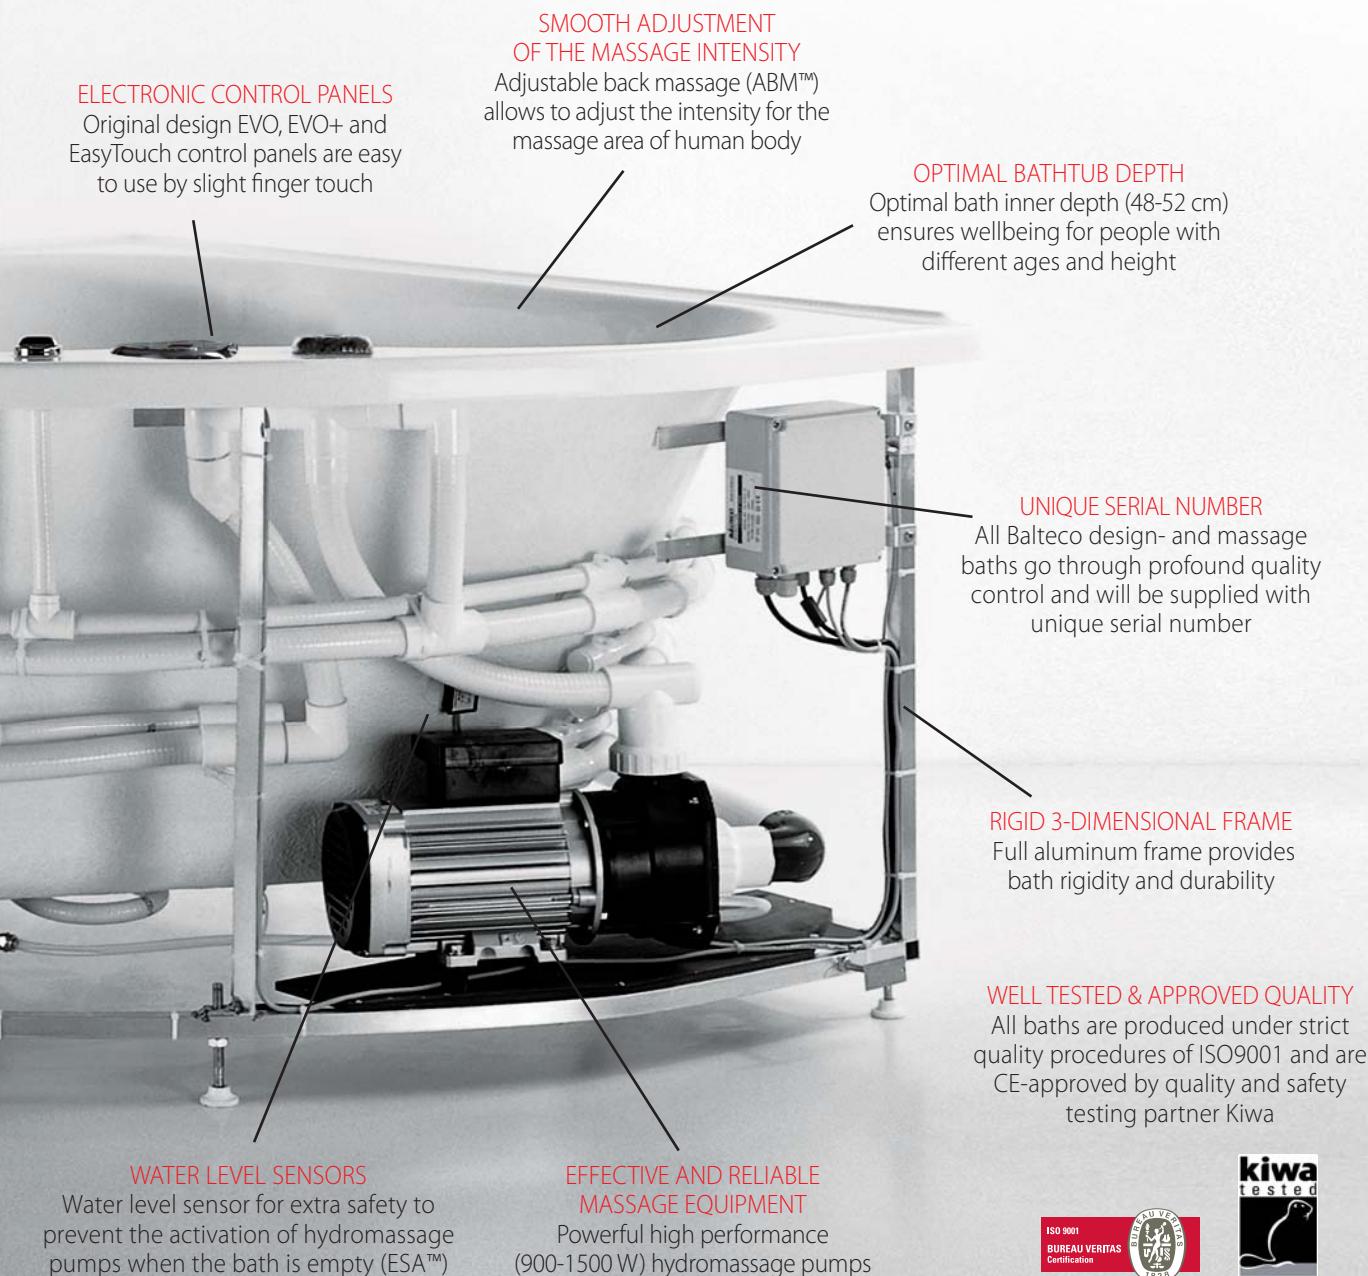

Balteco was the first company to introduce adjustable back-massage systems (ABM™) – nowadays it has become a standard amongst quality manufacturers. Still, Balteco hydromassage baths offer more through the unique adjustable back massage system. Custom designed water diverter placed on a bath rim allows for smooth manual adjustment of the backmassage intensity from full power of backmassage to no back area massage at all.

All Balteco hydromassage baths are equipped with a unique extra safety package ESA™ (Extra Safety Assurance). Package includes: a water level sensor preventing pumps from activating in an empty bath, a water inlet suction with high-volume suction cover and integrated safety valve, and double earthing.

Balteco's invaluable technical know-how is the result of decades of hard work. Our experience allows us to create some of the best product ranges on the market. With focus on research and development, we have set the standards for the whole industry with valuable functional innovations and outstanding technical solutions. Manifesting our advancements, these solutions – amongst many more – have been adopted by other manufacturers, too. We take it as a compliment.

For larger interior size hydromassage baths Balteco offers in addition to a standard one pump system also a system with two powerful pumps DHP™ (Dual Hydromassage Power). DHP™ consists of two separately mounted massage systems with separates function and controls. One pump provides for an effective general hydromassage and the other one for the back and footmassage systems.

As valuable enhancement to increase the intensity of hydro-massage even further, Balteco offers to its massage baths electronic turbo massage systems ETM™ (Electronic Turbo Massage). Electronic function may be activated by an easy touch of a button and water-air mixture pressure from water jets is maximized.

# PANEL+

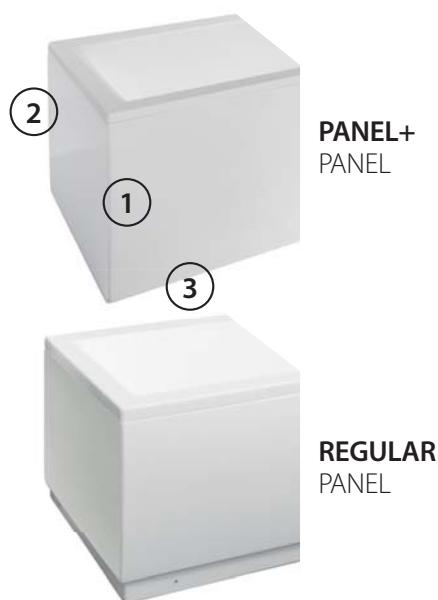

## UNIQUE AND AESTHETIC LOOK

In order to provide aesthetic look, purity in details and fast installation PANEL+ solution offers higher value-add than any other producer on the market.

### Advantages of PANEL+:

- ① L-type acrylic panels without visible connection
- ② Curved panel ends (no visible cutting lines)
- ③ Clean panels without screw caps – unique magnet fastening of panels

**HYDRO/AIRMASSAGE bath**

Airmassage of electronically adjustable intensity is delivered through the jets mounted on the bottom of the bath. System includes exclusive ultra sleek SlimLine hydromassage jets. Hydromassage is delivered through the jets mounted on the walls of the bath, massage intensity is adjusted using air regulation buttons positioned on the bath rim. System includes Adjustable Backmassage System (ABM™) and footmassage.

**HYDRO/AIRMASSAGE bath (2 pumps)**

Airmassage of electronically adjustable intensity is delivered through the jets placed on the bottom of the bath. Hydromassage is delivered both through the jets mounted on the walls of the bath and those of the back massage systems. Two separate pumps may be autonomously controlled and massage intensity is adjustable using air regulation buttons positioned on the bath rim. System includes 2 Adjustable Backmassage Systems (ABM™), or backmassage and footmassage system.

**HYDRO/AIRMASSAGE bath (2 pumps)**

Airmassage of electronically adjustable intensity is delivered through the jets mounted on the bottom of the bath. Hydromassage is delivered both through the jets mounted on the walls of the bath and those of the backmassage systems. Two separate pumps may be autonomously controlled and massage intensity is adjustable using air regulation buttons. Hydromassage jet flow intensity may be maximised by switching on Electronic Turbo Massage (ETM™). This system includes programmed underwater chromotherapy lighting system.

**SLIMLINE HYDROMASSAGE bath**

System includes exclusive ultra sleek SlimLine jets and accessories. Hydromassage is delivered through the jets mounted on the walls of the bath, massage intensity of different massage zones including back- and footmassage are adjustable by electronic control buttons positioned on the upper inside wall of the bath. System includes pre-programmed therapy program automatically rotating massage intensity of different massage areas.
